ABOUT US AND OUR PRODUCTS

Evolving from an industrial textile-converting base and servicing softplay equipment to designing and manufacturing our own unique range of indoor play areas and softplay systems.

SOFTPLAY SYSTEMS

We are specialists in design, manufacturing and installation of unique soft play environments for a very special softplay experience. Some of our unique softplay areas are now in the Casino play centers, Theme parks, restaurants and indoor play centers. Anywhere where there are toddlers that need entertaining in a safe environment or additional activities for older children in existing tunnel systems. Our components also form the base of many gross motor programs used across the country, in mother and child workshops, nursery schools and gyms as well as custom manufacturing for Occupational therapists.

Our softplay environments are ideal for 6 months to 8 years old age groups, but can be enjoyed by older children, often with a supplementary tunnel system. A softplay environment is colorful, stimulating and free from hard sharp shapes that can cause injury it can also be mobile for therapy play and play to develop gross motor skills that many take for granted. A softplay environment can also be customized to suit your space requirements and adopted to specific themes. Play is essential in every child's natural development. Play for every child is the medium that provides the opportunities needed to interact, socialize, associate, reason and communicate. We produce a range of products designed to enhance and enlarge a child's experience of the world. The opportunity to explore the environment safely in a stimulating way is an essential ingredient in the child's development.

Softplay toys are covered with reinforced PVC fabric in a variety of colours, Red, Yellow, Blue, Green, Orange, Navy, Lime, Pink and Purple. PVC is durable, tear resistant and easy to clean. It is waterproof and resistant to a wide range of household detergent and chemicals. Making the toys durable for both indoor and out door activities.

Our Softplay comes in three sizes to be sure the customer obtains age appropriate components.

MINI : aimed at crawlies and toddlers in the early stages of walking.

TODDLER: aimed at confident toddlers and early pre-schoolers.

PRESCHOOL: aimed at preschool environments and indoorplay centers. Can be used for older children.

Terms and Conditions Apply
